— Fruit concentrates —

Daya concentrate products:

Concentrate is one of the fruit products in which the juice, essential oil and its color are removed and as a result the durability of concrete is increased up to 2 years. Fruits will be stored for a long time without losing any of aroma or flavor. Juice and concentrate factories are usually built side by side to produce juice directly when there is seasonal fruit, and concentrate is used to make juice when seasonal fruit is not available.

Daya Trading Company produces different types of fruit concentrates with the best quality and the highest level of purity entering the international markets.

Usage of fruit concentrate:

- Fruit and juice drinks, nectars, smoothies, mix of different drinks, coffee and tea
- Dairy products and yogurt
- Ice cream, cafes and juice shops
- Creamy chocolate with fruit flavors, ice cream, ice pop and the covers of ice cream
- Fillings for cakes, cookies and bakery products, black kashk (Qarehqurut)
- Decorate salads, sauces and marinades
